PROFESSIONAL SUMMARY:

Motivated and detail-oriented Full Stack Developer with a strong foundation in Java, MySQL, React.js, Node.js and MongoDB. Experienced in developing responsive web applications, designing RESTful APIs, and implementing secure authentication systems through academic and internship projects. Passionate about building scalable, user-centric applications, solving real-world problems, and continuously learning modern web technologies. Seeking an opportunity to contribute technical skills and grow as a software developer in a dynamic organization.

SKILLS:

- Programming Languages: Java
- Database Management: SQL, MySQL, MONGODB
- Software Development Tools: Jupyter Notebook, Excel, Visual Studio Code, Eclipse
- Web Development: HTML, CSS, JavaScript, React.js, Node.js
- OOP: (Inheritance, Encapsulation, Abstraction, Polymorphism)
- Languages: English, Kannada, Telugu

EXPERIENCE:

Thiranex – Full Stack Developer Intern | [July 2026 – September 2026]

Developed and deployed full-stack web applications using the MERN stack by implementing responsive user interfaces and scalable backend services. Designed and integrated RESTful APIs, implemented secure JWT-based authentication, and managed MongoDB databases for efficient data handling. Collaborated on debugging, feature enhancement, deployment, and version control using Git and GitHub to deliver reliable, production-ready applications.

EDUCATION:

- | | |
|---|--------------------|
| • B-Tech in Computer Science – Presidency University, Bengaluru | Jul 2022– Jun2026 |
| • CLASS XII - RK Vision PU College, Chintamani | Aug 2020- May 2022 |
| • SSLC – RK Vision English Medium School, Chintamani | Jun 2019- May 2020 |

PROJECTS:

Task Flow Pro – MERN Stack Task Management System

Developed a full-stack web-based task management application that enables users to efficiently create, update, delete, search, and organize tasks. Implemented secure user authentication using JWT and designed a responsive dashboard with task analytics, priority management, and status tracking. Deployed the application on cloud platforms for seamless access and scalability.

Technologies: React.js, Node.js, Express.js, MongoDB Atlas, JWT, Bootstrap, Axios, Vercel, Render

AI-Based Crop Recommendation System

Developed a web-based crop recommendation application that helps users select suitable crops based on soil and environmental inputs. Designed the user interface and integrated the recommendation functionality to provide an easy-to-use platform for agricultural decision-making.

Technologies: HTML, CSS, JavaScript
